

MACSIM®

CHEMICAL Anchoring

High performance, European
Standards approved Chemical
Anchoring range with
uncompromising levels of strength is
perfect for any job, big or small.

SUPERLOAD Pure Epoxy

71SL585

Two part pure epoxy chemical resin, ideal for anchoring threaded rod and rebar into concrete.

FIRE RATED & WET AREA USAGE

- Extreme high bond strength/load resistance
- Use with all grades of threaded rod & rebar
- Use in cracked and non-cracked concrete
- For deep embedment installation
- Longer gelling times for large holes
- Use in wet & dry concrete, and wet holes
- Use in flooded environments
- Suitable for diamond drilled holes
- Use in elevated temperatures
- Overhead installations Styrene free with low odour
- BS6920 Tested and approved for use with drinking water

Approvals

ULTRABOND VES+ Vinylester

Cracked Concrete

Concrete

Hollow Brick

Hollow Concrete

71UBV420

Two part vinylester with very high bond strength, developed principally to anchor threaded rods and rebar into concrete. Used for high performance structural applications.

FIRE RATED & WET AREA USAGE

- Ultra high bond strength with high load resistance
- Used with all grades of threaded rod and rebar
- Used in concrete and masonry
- Fast gelling and curing
- Used in dry and wet concrete
- European approval for use in masonry with nylon sleeves
- Styrene free with low odour
- Economical fixing resin
- Close edge distance and small fixing spacing

Hollow Brick

Hollow Concrete

71UB

Two component high strength 10:1 ratio chemical anchoring resin system. It is designed as a fast curing high strength resin fixing anchor for very high loads and critical & overhead fixings especially in corrosive environments, or damp conditions.

- High bond strength with High load resistance
- Used with all grades of threaded rod and rebar in accordance with TR029
- Used in non-cracked and cracked concrete
- Fast gelling and curing
- Used in dry and wet concrete and flooded holes
- Used in critical or overhead applications
- Used in corrosive environments
- ETA tested based on life of anchor 50 years
- Used for post installed rebar installations under TR029 & TR023
- Used for solid and hollow masonry
- Low shrinkage enables large diameter installations
- Close edge distance and small spacing
- Manual cleaning up to 20mm diameter and embedment depths of 240mm
- Independently tested and approved
